OPERATIONS

1. The Chief, Saigon Bureau visited Singapore for the purpose of recruiting an Indonesian monitor and surveying the reception of Sumatran stations. An Indonesian recruit was located and will be brought to Saigon when cleared. A survey of Indonesian stations was made at the Radio Malaya monitoring site in Singapore. Reception was found to be generally good but technical facilities poor. Upon receipt of a further detailed report from [redacted] the problem of emergency monitoring at Radio Malaya will have further study. 50X1

2. Upon the arrival of a Spanish monitor at the Panama Post, coverage of Latin American stations has been augmented. Material of interest from Panama City radio has been filed and published. The Post reports that a Zonal closed-circuit communications system is being established, in which FBIS may be asked to participate. By this means, local service to [redacted] G-2 and the Embassy would be expedited. 50X1

3. IPS/USIA was informally approached with an FBIS proposal to consolidate its London communications operations in Caversham instead of continuing the joint operation in the new Embassy. This would have the effect of forcing USIS London to establish an independent communications center. USIA will study the problem and submit its views.

4. During the crisis in France the EBC expanded its French monitoring team from 3 to 10 people by curtailing Russian regional coverage for the diversion of multilinguists, and by recalling retired monitors to duty. A monitor from ECB was held in readiness through the month for possible additional support by TDY at Caversham, and the German Bureau was directed to coordinate emergency coverage plans. Coverage changes were made at ECB to ease the French load at Caversham. At EBC request, the FBIS field extended coverage of the French Union to Tahiti and New Caledonia during the height of the crisis.

5. The EBC-Mediterranean Bureau semi-annual Coverage Coordination Meeting, which was to have been held at Kyrenia in mid-June, was postponed because of the critical situation on Cyprus. The simultaneous visit of the Head, EBC Monitoring Service, was cancelled.

6. Following reports from two individual members of the Mediterranean Bureau staff on home reception of foreign telecasts at Kyrenia, the Bureau was authorized to purchase a European standard TV receiver, and an FM radio receiver for cruising and experimental coverage purposes. *will be shipped from Hq.*

**SECRET**

**SUBJECT: Monthly Progress Report for June 1958**

7. In mid-June Cairo Radio began daily transmissions in the Kurdish language advocating a unified Kurdistan. Teheran reacted promptly with the announcement it would shortly inaugurate regular service in Kurdish. Baghdad has for some time broadcast in Kurdish, but has not been covered since the resignation of the Mediterranean Bureau's Kurdish monitor two years ago. The Bureau has been requested to reallocate a position to Kurdish monitoring and to begin recruitment.

8. The Chief, FBID, War Plans Officer, Chief Engineer, Operations Officer, and the Chief, P&C Staff, CO, visited [redacted]

[redacted], for the purpose of surveying possible sites for the FBIS Emergency Relocation Center and for an alternate East Coast Bureau. The Department of Agriculture, which controls the area, will be approached for permission to run reception tests, when it has been determined that the required antenna field could be laid out on the land plot selected.

50X1

50X1

9. During June, FBID was the sole or a contributing source of 36% of the items published in the OCI Daily Digest.

10. Supplements to the Daily Report:

a. 4 June -- Khrushchev Speech at the 7th Congress of the Bulgarian Communist Party, 3 June

b. 19 June -- Tito Speech at Labin, 15 June

c. 20 June -- Text of North Korean Five-Year Plan, 11 June

d. 23 June -- Khrushchev Farm Policy Speech at CPSU Central Committee Plenum, 17 June

e. 24 June -- World Radio and Press Reaction to Trial and Execution of Imre Nagy.

which?

This report received very favorable comment from the DD/P, USIA, OCB and Department of State. A total of 925 copies was distributed to Government offices. The 26 June issue of the New York TIMES carried a lengthy report on statements by a USIA official concerning the non-communist world's reaction to the Hungarian events and quoting verbatim much of the material published in the FBIS report. A two-page summary was carried on the Wire Service for consumers in Washington and wirefiled to all recipients of the summary of Significant Foreign Radio Reportage (the "pink sheet") in the field.

11. Radio Propaganda Reports:

a. "Bloc Propaganda Treatment of DeGaulle During the French-Algerian Crisis," requested by RQH/OIS in support of a crash project for the DCI.

b. "Soviet Elite Statements on Inspection and Control of Nuclear

**SUBJECT: Monthly Progress Report for June 1958**

Disarmament," a compilation prepared at OCI request.

50X1

d. "Soviet Propaganda on the Nature of the Nuclear War Threat."

12. Special propaganda analysis services:

a. A typescript of Soviet propaganda on the use of earth satellites for military reconnaissance was prepared in support of SHIE 100-6-58, **IMPLICATIONS OF CERTAIN U.S. SATELLITE PROGRAMS.**

b. Statistical tables were prepared for USIA/IRI on the volume and bearing of Soviet propaganda on selected major topics.

50X1

d. At the request of the U.S. delegation to the Soviet-U.S. technical talks on control of a nuclear test ban, a typescript report on Soviet propaganda regarding inspection of nuclear disarmament was prepared to bring up to date the Radio Propaganda Report compilation on the subject. Service to the delegation in Geneva was initiated in the form of periodic cabled analyses.

e. As a service to the House Un-American Activities Committee, texts were assembled of all Moscow broadcasts since the beginning of 1956 that (a) criticized Congress and U.S. security agencies or (b) cited statements by American citizens praising Soviet policies or criticizing U. S. policies.

f. Bloc propaganda exploitation of forged U.S. documents published in the East German **NEUES DEUTSCHLAND** was reviewed in a typescript report requested by RQM/OIS.

g. Propaganda Analyses on the Wire:

(1) A background report on Khrushchev's threat to station Soviet missile bases in the satellites drew a complimentary letter from the Chief, National Indications Center.

(2) Other Wire items updated the Radio Propaganda Report on Soviet propaganda treatment of French-Algerian developments; supplied background on Soviet propaganda threats that the USSR might resume nuclear weapons tests in the light of Khrushchev's denial of Soviet plans for resumed testing; and called attention

ULUHLI

**SUBJECT: Monthly Progress Report for June 1958**

to the negligible propaganda follow-up of the USSR's favorable response to the United States' Antarctic proposal.

(3) At OCB request, a Wire item rounded up world reaction to Khrushchev's 3 June bid for Soviet-U.S. trade.

**13. Special services rendered by FBID:**

a. The service to the U.S. representative at the Sino-American talks in Geneva continued.

**FACILITIES**

14. Phase IV of the Allocated Communications Plan was activated on 10 June to extend the allocation to Okinawa and to complete the Plan. As with Phase III the early days of the operation were severely hampered by many outages, which were finally traced to the quality of the Japanese tie-line between FBIS and the radio facilities. Arrangements have been made to re-route this circuit more directly in an attempt to improve performance. The Tokyo communications section is now up to full strength.

15. A radioteletype communications link has been installed between the Mediterranean Bureau and the Cable and Wireless Ltd. terminal, Nicosia, supplementing the landline circuits for emergency purposes. The radioteletype link with MECA remains, but under terms of the agreement with the British is available only when the Nicosia-London circuit is out. The new link can be used in cases of sabotage or other outage between Karavas and Nicosia.

16. A VHF radiophone link has been established between the Mediterranean Bureau headquarters at Karavas and the home of a staff officer in Kyrenia. It insures capability to communicate information and instructions for personnel security, including evacuation, under extreme circumstances. A block warden system encompassing all FBIS residences in Kyrenia has been organized to complete the contact with all employees and dependents.

17.  Electronic Specialist who is departing in July on PCS at the Mediterranean Bureau, will spend several weeks enroute in Vienna, for the purpose of assisting that bureau with technical requirements and planning for a possible transfer of Satellite coverage from the Mediterranean Bureau. 50X1

18. A contract in the amount of £ 2042 was signed covering installation of an electric power distribution system at the Mediterranean Bureau for window-type air conditioning. A contract was also signed for £ 279 for construction of a secure cryptographic room.

19. Two sets of semi-automatic tape relay equipment, type AN/TGC-1,

SECRET

**SUBJECT: Monthly Progress Report for June 1958**

have been installed on outgoing Allocated Channels TWA and TOB in Tokyo. The Bureau was authorized to procure from local Army Signals sources an additional three units, one for the Tokyo Bureau for use on the outgoing common-user circuit and two for shipment to Okinawa. Use of this equipment makes possible a considerably higher circuit utilization, particularly during heavy traffic filing times.

20. A contract has been entered into covering the construction of two 3600-foot Beverage Wave antennas and four 750-foot sloping Vee antennas for the Hokkaido Bureau at a cost of \$4510.

21. A portable transistorized receiver, a portable tape recorder and a vertical (whip) antenna were ordered for addition to the existing emergency complements stored at the Okinawa, Tokyo, London and Mediterranean Bureaus.

22. The construction program on Okinawa of the Motor Pool, duplex porches and quonset rehabilitation is now completed.

#### ADMINISTRATION

23. Orientations in FBID:

a. 6 June -- [redacted] of ORR and a group from DES, Department of State, which included Mr. John Shaw, Chief of the Soviet (Affairs Branch). 50X1

24. The Division submitted operating budget estimates for 1959 and preliminary estimates for 1960. *Foreign*

25. The FBID Table of Organization was revised to establish four additional Teletype Operator positions at headquarters to take care of the additional traffic resulting from the improved communications system recently implemented. This was accompanied by the deletion of four positions in other components of FBID.

26. The Saigon Bureau native Table of Organization was increased by one position to accommodate an Indonesian monitor.

27. During June, five persons entered on duty and two were separated. On-duty strength as of 30 June 1958 was [redacted] including six on LWOP. 50X1
